

# Handy Marketing Agent - Summary

## Objective

Build an internal autonomous marketing agent for Handy Set Go that acts as a Head of Marketing, generating daily content, campaign ideas, and strategic recommendations.

## Core Concept

- Not a product for others — an internal CMO agent
- Focus on outcomes: awareness, leads, and positioning
- Simple, execution-focused system

## Daily Autonomous Loop

- Load strategy and past context
- Decide daily marketing priorities
- Generate content (post, hooks, CTA)
- Review quality
- Store outputs
- Deliver daily brief
- Capture feedback

## System Architecture

- Scheduler (triggers daily run)
- Planning Engine (decides what to do)
- Content Generator (creates assets)
- Review Engine (quality control)
- Persistence Layer (database)
- Delivery Layer (dashboard/brief)

## Key Outputs Per Day

- 1 main post

- 2 hook variations
- 1 CTA
- 1 campaign idea
- 1 recommended action

## Core Modules

- Strategy Module (ICP, messaging, positioning)
- Memory Module (history, feedback)
- Daily Run Service (orchestration)
- Planning Engine
- Content Generator
- Review Engine
- Feedback Module

## API Endpoints (Examples)

- POST /api/v1/runs/daily
- GET /api/v1/runs
- GET /api/v1/assets
- PATCH /api/v1/assets/{id}
- POST /api/v1/feedback
- GET/PUT /api/v1/strategy

## Database Structure

- strategy
- daily\_runs
- assets
- campaigns
- feedback

## Folder Structure (Simplified)

- app/api/

- app/services/
- app/db/
- app/prompts/
- app/workers/
- tests/

## **Build Phases**

- Phase 1: Core generation + strategy
- Phase 2: Review + storage + UI
- Phase 3: Feedback + automation

## **Key Insight**

The value is not automation alone, but making good daily marketing decisions. Start simple, iterate fast, and evolve toward autonomy.
